S.I.A.F Chairman

Participation makes your union stronger

Once again, our training center becomes the greatest tool we have to combat the adversaries of unionized, skilled labor, our employers, and other partners of our industry that came under attack earlier this year. In fact, many times employers pointed to our world-class training facility during testimony in front of Wisconsin legislators as they asked, "Who else would be able to replicate a facility or training program like the one put together by the Operating Engineers?"

There is one short and simple answer to that - Nobody! So while these legislators tinker with a system within an industry very few of them understand at all, we continue to grow our program and move our industry, our employers and in particular, the quality, skills and efficiency of our members forward. No matter what attacks our industry might sustain in this environment, one fact remains; as long as we continue to lead the path forward in safety, training and certifications, more and more people on the outside will come to realize just how much the industry depends on our training program and how difficult it would be to maintain a skilled and qualified workforce without such a program.

There is one very important component missing to make this all work; your participation. Our membership has made the commitment to making this state-of-the-art facility available so that our membership can continue to stay on top. And the final commitment is your willingness to come and participate in the program.

You see, every time an individual member participates, it increases the value that you bring to our organization which makes us all a little stronger. So it stands to reason that the more participation we get, and the more skilled and educated we get, the stronger we will become as a union. And that is something that nobody can take that away from us. We look forward to seeing you in Coloma!

Fraternally,
Terry McGowan
IUOE General Vice President
President/Business Manager, Local 139

Daniel Sperberg
IUOE 139 Vice President
Training Director

Welcome! As Vice President and Training Director of the International Union of Operating Engineers Local 139, I'd like to introduce you to the union's training course schedule for 2015-16. We are very excited about the training opportunities we will be offering to you in the upcoming training season.

I encourage all new members, along with long standing members to page through our schedule. The importance of a highly trained workforce is more important now than ever.

With the new addition of classrooms and an indoor training arena to the Coloma Training Center, we are offering more course opportunities than ever before.

One of the most powerful resources available to you as a member of I.U.O.E. Local 139, is the training that is available to you. Lessons can be learned from a variety of sources including but not limited to classroom instruction, in-seat instruction and invaluable advice from fellow brothers and sisters. Don't under estimate the potential of the training that is available to you!

Come visit us at the Coloma Training Center.

Fraternally,
Daniel Sperberg
IUOE 139 Vice President
S.I.A.F. Training Director

2015 - 2016 COURSE SCHEDULE

Placement in courses will be on a first-come, first-serve basis. Every attempt will be made to place you in your 1st choice. Should any course be full, you will automatically be placed as an alternate for that course. All courses are subject to change of location or cancellation due to lack of enrollment. All reservations will be confirmed in writing.

If you need to cancel a course, please call as soon as you know you won't be able to attend. Failure to call and cancel deprives others of the opportunity to attend training.
