COURSE SCHEDULE 2022 - 2023

TERRY MCGOWAN
S.I.A.F. CHAIRMAN
PRESIDENT/BUSINESS MANAGER

DANIEL SPERBERG
TRAINING DIRECTOR
VICE PRESIDENT

2022-2023 COURSE SCHEDULE

Terry McGowan
IUOE General Vice President
IUOE 139 President/
Business Manager
S.I.A.F Chairman

This work season, Local 139 has once again taken in some new members and whether they are apprentices or journey workers, this article is intended to reach out and encourage them to take the time to enroll in one or more of the many quality courses that are made available in our 2022-2023 Training Schedule. Of course, the apprentices may have already taken certain, required courses, but they can quickly accelerate their skills by signing up for additional courses made available to them. To the new journey workers, I strongly urge you to take advantage of our training center. I realize some of you may have been in our industry for a while, but I can say with a great degree of confidence that you have never seen anything like our training facility. No matter what your status in Local 139, be assured that you will be welcomed by your fellow members and our training staff with a friendly greeting and open arms. For our new members, that means you will find the friendship and courtesy of fellow union members that come with the unspoken respect you achieve simply by showing the initiative to elevate your skills within our craft. You see, as you further your skills within the craft, you become a positive reflection upon our entire organization. You make it easier for your representatives at the bargaining table to make a legitimate argument with your employer as to why you deserve a pay raise. You greatly increase the odds that you and all of your co-workers will make it home safely to your families at the end of each workday. You also increase the competitiveness of your employer which greatly enhances their ability to win additional bids which will equate to more work hours for you and your crew. But just like our fore-fathers, training is something we must take on as a personal challenge, as a matter of pride to advance our skills and elevate our organization. The biggest difference today is the fact that we now have a world class training center that we can rely upon as opposed to the school of hard-knocks like our predecessors. But make no mistake; the recipe to your continued success as a member of Local 139 depends largely on self-motivation. Motivation to invest in yourself by taking the time to attend as many classes as you possibly can and learn from the team of some of the finest and most knowledgeable professionals in our industry. So, if you are on the jobsite with any of these new members, please talk to these Brothers and Sisters and make them aware of the state-of-the-art facility that our membership has developed. Make them aware that the better operators we become as a union it makes it easier to negotiate pay raises. Make them aware that because our membership elected to invest in this school, it makes it easier for them to invest in themselves. And we will see you in Coloma!

Fraternally,
Terry McGowan
IUOE General Vice President
President/Business Manager, Local 139
Chairman, Skill Improvement and Apprenticeship Fund

Daniel Sperberg
IUOE 139 Vice President
Training Director

Welcome, as Vice President and Training Director of IUOE Local 139, I am pleased to share with you the 2022-2023 training schedule. Once again, our course offerings at the Joseph J. Goetz Training Center and other training locations throughout Wisconsin have expanded in order to better serve you, the membership. In this year's course schedule, you will find over 300 safety certification courses and over 200 equipment training courses available to you.

Our staff devotes their time and effort each year into developing the course schedule so that you may continue to acquire and refine your skills in the trade. We are pleased to continue offering both the Hazmat and MSHA refresher courses online this training season, in addition to the 8 locations throughout Wisconsin, making it more convenient to remain current on these important safety certifications.

Another exciting opportunity this training season will be for members to take advantage of the International Training Center in Crosby, Texas. We will be offering both the Basic Excavating course and the Basic Equipment course for first year apprentices there as hybrid courses. These will consist of members completing one week of training online before attending one week of training in Texas. Both courses will be an excellent opportunity to advance your career while experiencing all the International Training Center has to offer.

As a member of IUOE Local 139, one of the most valuable resources available to you is the certification and equipment training offered to you. Taking advantage of this training continues to ensure that our jobsites are not only productive, but also safe each and every day. Attending training also gives you opportunities to further your skills, connect with your Brothers and Sisters in the trade, and learn from our knowledgeable team of training staff. I look forward to seeing you in Coloma this training season as you put these resources to work for you to the benefit of yourself, your contractor, and your union.

Fraternally,
Daniel Sperberg
IUOE 139 Vice President
S.I.A.F. Training Director

Welding Basics (1 Week)

Instruction focuses on welding safety, equipment set-up and operation, electrode selection, gas selection and basic metallurgy when welding steel using both stick and wire feed methods. Repair welding with torch set-up and operation, air arc operation, and plasma cutting are also emphasized.

Important Information

-All courses are 8:00 AM - 4:30 PM unless otherwise stated.-

Placement in courses will be on a first-come, first-serve basis. Every attempt will be made to place you in your 1st choice. Should any course be full, you will automatically be placed as an alternate for that course. All courses are subject to change of location or cancellation due to lack of enrollment.

If you need to cancel a course, please call our office as soon as you know you won't be able to attend. This allows others an opportunity to attend training.

SITE POLICY ACKNOWLEDGEMENT:

By applying for training courses with the Wisconsin Operating Engineers Training Center, I understand that it is my responsibility to familiarize myself and comply with the policies and procedures in place to ensure the rights of all students in attendance. Site policies are available at all IUOE Local 139 offices, or you may view them any time on our website at 139training.org. I further acknowledge that it is my responsibility to keep myself updated on any changes to these policies.

Please note that due to the changing circumstances regarding COVID-19, face masks and temperature checks may be required for members attending training at the training center.

DRESS CODE & PERSONAL PROTECTIVE EQUIPMENT:

All members using the Training Center must wear shirts with sleeves (no tank tops or sleeveless shirts), full length work pants (no sweat pants, shorts, or pajamas) and no sandals or open-toed shoes.

OSHA regulation work clothes and PPE (hard hat, gloves, work boots, etc.) are required for all field training. You will also need appropriate cold weather gear; all courses include hands-on exercises or demonstrations that may require outdoor training.

PER DIEM FOR MEMBERS OF LOCAL 139:

Members of Local 139 in good standing are eligible to receive \$20/day per diem FOR COURSES HELD AT THE JOSEPH J. GOETZ TRAINING CENTER IN COLOMA. Per Diem will be paid only for full days of attendance. It is NOT paid for 1, 2 or 3 day courses. Per Diem is NOT paid for make-up days or days the individual is late or leaves early.

All Local 139 Union Membership obligations, including dues, must be current to be eligible to attend training.

Attention Apprentices

A total of 400 hours of related instruction is required for your apprenticeship, as well as an 8 hour Transition to Trainer course. Please be aware that you must complete at least 160 hours of related instruction per academic year (June 1, 2022— May 31, 2023) or your apprenticeship may be cancelled by the State Bureau of Apprenticeship.

Required 1st Year Courses

- **Basic Equipment (80 Hours)**
- **Basic Maintenance (40 Hours)**
- **Construction Regulations (40 Hours)**

Required 2nd Year Courses

- **Basic Grade (40 Hours)**
- **40-Hour Hazmat (40 Hours)**

Your choice of one of the following equipment courses (80 Hours):

- **Asphalt Paving, Basic Crane, Basic Excavating, Directional Drill or Scraper**
- **Remember to maintain all safety certifications (Hazmat, MSHA, CPR, etc.)**

Required 3rd Year Courses

80 Hour Elective

- **Your choice of any course(s) totaling 80 hours. Can include but not limited to: Dozer, Lattice Crane, Advanced Grade, Load Charts, Welding, CDL, etc.**
- **Remember to maintain all safety certifications (Hazmat, MSHA, CPR, etc.)**

Course fees for the 2022-2023 training season:

40 hour course: \$190.00

80 hour course: \$335.00

Transition to Trainer: \$35.00

All course fees are collected on the first day of the course.

These fees may be reimbursable through the ACAP grant, you will receive paperwork for this in the mail. Please save all course receipts to submit for this reimbursement.

Concrete Pumping (1 Week)

Topics included in this course consist of general requirements, PPE, examining a pre-pour plan, selecting the right size and type of equipment required to make the pour, the concrete pumping system, and where to locate the pump in the safest position. *40 hours*

Coloma

Mar. 13—Mar. 17, 2023

Concrete Paving (1 Week)

This course includes general requirements, operation, paving procedures and processes, safety practices, and maintenance associated with concrete pavers. *40 hours*

Coloma

Mar. 20—Mar. 24, 2023

Basic Motor Grader (2 Weeks)

This is a course for the beginner and advanced operator alike. Instruction will include basic motor grader operation, including dirt and gravel techniques. Curriculum will focus on field operations; including haul roads, roundabouts, curb work, and blading to grade with automated blade control. *80 hours*

Coloma

Oct. 24—Oct. 28, 2022*

Dec. 12—Dec. 16, 2022*

Jan. 2—Jan. 13, 2023

Jan. 16—Jan. 27, 2023

Jan. 30—Feb. 10, 2023

Feb. 13—Feb. 24, 2023

**Offered as a 1 Week (40 hour) course these dates only*

Course Registration

2022-2023 COURSE REGISTRATION OPENS ON SEPTEMBER 26TH, 2022

The preferred method to register for courses is by calling our office.

715-228-4911

You may also register online through the Local 139 Member Portal.

To register online, set up your account on the union's website at www.iuoe139.org. Please feel free to contact our office with any questions about registering online.

Motor Grader – Advanced (1 Week)

This course can be tailored for any level of experience or geared to provide evaluations for more experienced operators. Topics covered include safety aspects, preventive maintenance, operating techniques, and proper procedures for using motor graders in both classroom and hands-on simulations. *40 hours*

Coloma

Feb. 27—Mar. 3, 2023

Mar. 6—Mar. 10, 2023

Mar. 13—Mar. 17, 2023

Mar. 20—Mar. 24, 2023

Mar. 27—Mar. 31, 2023

Apr. 3—Apr. 6, 2023

Apr. 10—Apr. 14, 2023

The registration form on pages 17-18 may also be completed and returned to our office for course registration. This form may be mailed, faxed, or emailed back to our office.

Certifications & Qualifications

40 Hour Hazmat (1 Week)

This course will provide basic information needed to protect HAZWOPER Site Workers from health, physical, and biological hazards. This course meets the requirements of OSHA 29 CFR 1910.120 (Hazardous Waste Operations and Emergency Response) and OSHA 29 CFR 1910.146 (Permit Required Confined Space). Training will be a combination of both hands-on and classroom instruction. *40 hours*

Required for Registered Apprentices indentured in 2021.

Certification will need to be refreshed every 12 months.

**Altoona, Appleton
Madison, Pewaukee**

Dec. 5—Dec. 9, 2022

Apr. 3—Apr. 6, 2023

Apr. 10—Apr. 14, 2023

Disaster Site Worker (4 Days)

This is a four day course that integrates the OSHA 10 Hour program for General Industry into the overall class curriculum and is intended to provide the basic understanding of the role of skilled support workers in response to natural and man-made disasters. A key element to the learning objectives is to increase awareness of the difference between disaster sites and regular construction or demolition sites. Successful participants will be able to demonstrate a clear understanding of the Incident Command System, the proper inspection and use of an air-purifying respirator and other key points. The goal of this course is to establish a growing contingent of appropriately credentialed operating engineers who are recognized and may be called upon by emergency response organizations at all levels of government. *32 hours*

Coloma

Dec. 19—Dec. 22, 2022

Apr. 3—Apr. 6, 2023

Basic Scraper (2 Weeks)

Introduces operators to basic scraper applications using single engine scrapers, push tractors and related support equipment. Instruction will include equipment controls, safe operation, jobsite navigation and key communication processes. *80 hours*

80-hour Required Related Instruction Option for Registered Apprentices indentured in 2021.

Coloma

Feb. 13—Feb. 24, 2023

Feb. 27—Mar. 10, 2023

Mar. 13—Mar. 24, 2023

Scraper – Advanced (1 Week)

This course is offered to operators with previous experience in scraper operation. Course emphasis will include advanced techniques in sloping, stockpiling and cut and fill operations using single and double engine scrapers. Instruction will also include push tractor and support equipment operations associated with scraper applications. *40 hours*

Coloma

Mar. 27—Mar. 31, 2023

Apr. 3—Apr. 6, 2023

Apr. 10—Apr. 14, 2023

Directional Drilling (2 Weeks)

Students will receive instruction in underground directional boring. There will be extensive hands-on training in this course in addition to Training and Knowledge modules associated with Midwest Energy Association's (MEA) Operator Qualification. *80 hours*

80-hour Required Related Instruction Option for Registered Apprentices indentured in 2021.

Coloma

Jan. 2—Jan. 13, 2023

MEA/ OQ (4 Days)

The OQ rule requires that individuals who perform covered tasks on a pipeline need to be trained and qualified to perform those tasks. The intent of the OQ rule is to ensure a qualified workforce and to reduce the likelihood of pipeline incidents caused by human error. Each task is most often comprised of a minimum of three requirements that must be fulfilled in order to be considered “qualified” for the task: 1. Online Training (TNG); 2. Online Testing (KNT); 3. Performance Evaluations

When using MEA’s Energy-U learning management system (LMS), members take training and testing courses online at the Training Center. Performance evaluations are also conducted onsite by an approved MEA Evaluator using MEA evaluation forms.

32 Hours (Duration is dependent on individual need)

Recertification is dependent on completed certification expiration.

Specialty Training

CDL Training & Testing

You must have your Class A Commercial Driver's License Instruction Permit and your DOT Medical Examiner's Certificate before scheduling a test. A CDL road test can be scheduled by contacting Todd Liebelt at the Joseph J. Goetz Training Center in Coloma. Call the Training Center at (715) 228-4911.

NCCCO Testing

Call Todd at the Training Center to receive an information packet to apply online. Please specify if it will be for Mobile Crane, Tower Crane and/or Overhead Crane. Listed below are the upcoming written test dates with the corresponding Test Site number needed for completing the application on CCO's website.

Call the Training Center at (715) 228-4911.

Test Date	Application Deadline	Test Site Number
Sun., Nov. 6, 2022	Fri., Oct. 14, 2022	WI 50712
Sun., Feb. 12, 2023	Fri., Jan. 20, 2023	WI 47119
Sun., May 21, 2023	Fri., Apr. 28, 2023	WI 47120
Sun., Aug. 20, 2023	Fri., Jul. 28, 2023	WI 47121
Sun., Nov. 5, 2023	Fri., Oct. 13, 2023	WI 50713

Tower Crane Training

Training on the tower crane is available as random training at the Training Center. Tower Crane training can be scheduled by contacting Todd Liebelt at the Joseph J. Goetz Training Center in Coloma. Call the Training Center at (715) 228-4911.

Crosby Texas Training

These courses will take place at the International Training Center in Crosby, Texas. After registering for a course, you will be contacted by the Coloma Training Center with information regarding your travel arrangements.

Please contact our office at 715-228-4911 with any questions or for more information about these courses .

Basic Excavating Hybrid (2 Weeks)

- **Week 1-** This week will consist of coursework done remotely online. All online coursework must be completed, submitted to our office, and have received a passing grade at least 30 days prior to registering for the Week 2 in-person portion of this course.
- **Week 2-** This week will consist of in-person training at the Crosby, Texas International Training Center. You can register for the Week 2 dates listed here after completing the Week 1, remote portion of the course. 30 days is needed from registration until the start of the in-person course date to allow for travel arrangements to be made.

Instruction will be given in safe basic operation of the wheel loader, tractor loader backhoe, and excavator. This course will also include how to safely work around utilities and trench excavation. Curriculum implements construction industry standard practices, OSHA excavating and trenching regulations. *80 hours*

Basic Equipment Hybrid (2 Weeks)

- **Week 1-** This week will consist of coursework done remotely online. All online coursework must be completed, submitted to our office, and have received a passing grade at least 30 days prior to registering for the Week 2 in-person portion of this course.
- **Week 2-** This week will consist of in-person training at the Crosby, Texas International Training Center. You can register for the Week 2 dates listed here after completing the Week 1, remote portion of the course. 30 days is needed from registration until the start of the in-person course date to allow for travel arrangements to be made.

This course will introduce the many different types of construction equipment and the varied environments the operating engineer may operate machinery in. Equipment jobsite functions and safety requirements will also be addressed. Training will include Qualified Signal Person, WI Flagger Training Certification, Telescopic Material Handler/Forklift Operation Certification, operation of an Articulated Haul Vehicle and Skidsteer Safety. *80 hours*
